Title description

#1 NEW YORK TIMES BEST SELLER • AT LAST, A BOOK THAT SHOWS YOU HOW TO BUILD — DESIGN — A LIFE YOU CAN THRIVE IN, AT ANY AGE OR STAGE • "LIFE HAS QUESTIONS. THEY HAVE ANSWERS." — THE NEW YORK TIMES

Designers create worlds and solve problems using design thinking. Look around your office or home — at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve.

In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise.

ROBERT GREENE The 48 Laws of Power

THE MILLION COPY INTERNATIONAL BESTSELLER

'Sun Tzu better watch his back' New York Magazine

'If power is your ultimate goal, this is the book you need' The Times

'At last, the book to help you scheme your way into the upper echelons of power' Daily Express

Amoral, cunning, ruthless, and instructive, this piercing work distills three thousand years of the history of power into forty-eight well-explicated laws. As attention-grabbing in its design as it is in its content, this bold volume outlines the laws of power in their unvarnished essence, synthesizing the philosophies of Machiavelli, Sun-tzu, Carl von Clausewitz, and other great thinkers.

Some laws require prudence ("Law 1: Never Outshine the Master"), some stealth ("Law 3: Conceal Your Intentions"), and some the total absence of mercy ("Law 15: Crush Your Enemy Totally"), but like it or not, all have applications in real-life situations.

Illustrated through the tactics of Queen Elizabeth I, Henry

Introduction: Life by Design

Ellen liked rocks. She liked collecting them, sorting them, and categorizing them according to size and shape, or type and color. After two years at a prestigious university, the time came for Ellen to declare her major. She had no idea what she wanted to do with her life or who she wanted to be when she grew up, but it was time to choose. Geology seemed like the best decision at the time. After all, she really, really liked rocks.

Ellen's mother and father were proud of their daughter, *the geology major, a future geologist*. When Ellen graduated, she moved back home with her parents. She began babysitting and dog walking to make a little money. Her parents were confused. This is what she had done in high school. They had just paid for an expensive college education. When was their daughter going to turn magically into a geologist? When was she going to begin her career? This is what she had studied for. This is what she was *supposed* to do.

The thing is—Ellen had realized she didn't want to be a geologist. She wasn't all that
